CivicCare - AI-Powered Civic Grievance Command

From Civic Complaint → Verified Resolution

Center

Theme : Digital Democracy

Impact

- Effective Grievance Redressal
- Strengthens Public Trust
- Data driven Accountability
- Reduces delays & corruption
- Smarter use of public funds
- Ward Performance >>
- Measurable Sustainable Development Goals

Core Engine

- AI-Integrated PS-CRM
- Gamified Workflow
- HUGIS + SDG Mapping

Governance Flow

- Report → Assign → Resolve
- AI task allocation
- GPS-Locked Proof
- Time-Stamped Closure
- AI Insights & Analytics

Mission : From Citizen Voice to Real-Time, Accountable Governance

Where Legacy Systems Fall In MCD ?

Real-world challenges

- Delayed Resolution
- Lack of verification
- Limited transparency
- No micro-accountability
- No Ground-Level SDG Tracking
- 2,000+ unresolved civic complaints

Why These Problems Matter ?

- ✗ Wasted public funds
- ✗ Slow civic response
- ✗ Weak citizen trust
- ✗ Small issues become systemic failures

Inefficiencies in Current Systems

Fragmented UX

Poor Data Quality

Jurisdictional Spam

Misrouting Bottlenecks

CivicCare : From Broken Governance → Smart Civic Response

What is CivicCare ?

CivicCare is an AI powered Civic Grievance platform with rich analytics accessible via both MOBILE and WEB.

Its interface **adapts to each user's role**, making it easy for citizens, managers, and field assistants to report, track, and resolve MCD grievances efficiently.

Why CivicCare ?

- Not a complaint box, it's a complete ecosystem built for transparent civic governance which wins public trust.
- From intelligence to public awareness, every feature is an interconnected link in the chain of accountability.

CivicCare's Innovation & Unique Features

User Experience

- Photo + Location Evidence
- Voice - based reporting
- community engagement - live feed
- Real-time grievance tracking
- Privacy & Accessibility: Sensitive Blur & Multi-language support

Role-Based Access Control

- Citizens
- Field Managers
- Field Assistants
- Ward Councillor, Mayor, Commissioner

AI-Driven Governance

AI-powered analysis and automation for faster, smarter civic service delivery

1. **AI Fraud Detection** : Identifies fake, duplicate, or non-civic complaints.
2. **AI Dynamic Worker Dispatch with reason** : Assigns the suitable field worker based on location, expertise, & workload
3. **AI data insights** : Analyzes complaint patterns to reveal trends and department performance.
4. **LLM Admin Assistant** : Helps admins query data and generate reports quickly.

Who **Benefits** What?

Citizens of Delhi

- 48-hour grievance resolution
- Real-time complaint tracking
- GPS-verified proof of action

Field Assistant & Field Manager

- Clear AI task allocation with reasoning
- Smart categorization (right dept routing)
- Performance recognition (gamified scoring)

Admins, Mayor, Commissioner

- Real-time ward & city dashboards
- Escalation & bottleneck detection
- Performance benchmark across wards
- SDG-aligned impact measurement

The City/Society

- Cleaner, & safe neighbourhoods
- Faster civic response cycles
- Transparent local governance
- Active community participation

CivicCare's System Design

How CivicCare's Modules Interact ?

Measuring Progress : From Grlevance to SDG Impact

Departmental Performance Index (DPI)

A score that shows how efficiently a department performs its work based on multiple key factors.

- **Resolution Efficiency (RE)**
How many complaints the dept successfully solves compared to how many complaints it receives.
- **Service Velocity (SLA)**
How quickly the dept solves complaints, especially whether they finish them within 48 hours.
- **Caseload Health (CH)**
How well the dept keeps its pending work under control
- **Resolution Integrity (RI)**
How often the dept solves a complaint correctly the first time without needing rework.
- **Escalation Mitigation (EM)**
How well the dept handles problems on its own without needing to pass them to higher authorities.

Civic Impact Score - measures the quality of a citizen participation

- **Complaint Accuracy** - correctly filled complaints
- **Interaction Quality** - Meaningful upvotes/comments on others' complaints
- **Invalid Entry Penalty** - AI flags wrong/irrelevant submissions
- **Low-Quality Interaction Penalty** - Abusive or spammy comments

Department Performance = SDGs Performance

The department's overall performance score is calculated based on these key service metrics (SDGs). In simple terms, better handling of complaints means better dept performance and better Sustainable Development
